Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

ARCHIVES OF PSYCHOLOGY

RECENT NUMBERS

19. **An Empirical Study of Certain Tests for Individual Differences.** MARY THEODORA WHITLEY. Pp. 146. $1.25; cloth, $1.50

An experimental testing of various tests of memory, association, perception, movement, etc., with indications of the relative value of different forms of test.

20. **Visual Acuity with Lights of Different Colors and Intensities.** DAVID EDGAR RICE. Pp. 59. 50 cents; cloth, 75 cents.

An experimental determination of visual acuity under red, green, blue, and uncolored illumination, and of the dependence of this acuity on intensity of the illumination, test characters, individual differences, and photometric methods employed.

21. **The Curve of Forgetting.** C. H. BEAN. Pp. 45. 45 cents; cloth, 70 cents.

A study of the rate at which simple motor acts, sensory impressions, and sensori-motor experiences are forgotten and of the dependence of the curve of forgetting on degree and distribution of learning, on method and material, and on individual differences.

22. **The Influence of Caffein on Mental and Motor Efficiency.** H. L. HOLLINGWORTH. Pp. 167. $1.50; cloth, $1.75.

Complete report of an extensive investigation of the influence of caffein on accuracy, speed, and quality of performance in tests covering a wide range of sensory, motor, and higher mental processes including also general health and quality and amount of sleep.
